

SENIOR WASTE CONTAINER MAINTENANCE WORKER*Class Definition*

Under supervision, performs semi-skilled work in the maintenance of waste containers; may provide functional and technical lead direction to assigned staff.

Distinguishing Characteristics

Senior Waste Container Maintenance Worker is the advanced working/lead level class in the Waste Container Maintenance Worker series. The incumbent performs semi-skilled work in the repair and maintenance of waste containers, including cleaning, welding, and painting of the containers. This class differs from Waste Container Maintenance Worker in that incumbents in that class perform duties in accordance with established procedures and do not provide lead direction to others. It differs from Combination Welder II in that incumbents in that class are responsible for product fabrication and a variety of other skilled tasks.

Typical Tasks

(This list is neither inclusive nor exclusive. Consequently, this information may not reflect Essential Functions for this class.)
